Dear FCC,
Please reject Petition 04-160 from the NAB. I use the traffic information on my satellite radio every morning. It is constant and I don't have to wait through advertisements and news or talk that I don't want to hear.

I pay extra for satellite radio for this and other reasons. It is unfair to make me turn off my satellite radio and turn on my AM or FM radio to get that information. I pay monthly for satellite radio and I believe that it is my right to purchase information about the state of freeway traffic. Those who want if free can listen to AM or FM and put up with the wait, should they so choose.

I believe the the NAB wants to restrict competition in this regard. That is against everything we stand for. Innovation should be rewarded so long as it does not steal from the artistic creation of another.
